

Song-Gia BMT Series – Experience the Stable, Fast, and Impactful Feed of Machining

BMT-44
BMT-45
BMT-55
BMT-65

1. High-Precision Structural Design

Featuring a High-Strength body combined with precision grinding, this design enhances machining stability and concentricity to ensure consistent accuracy in every operation.

2. Center-Through-Coolant Direct to the Cutting Point

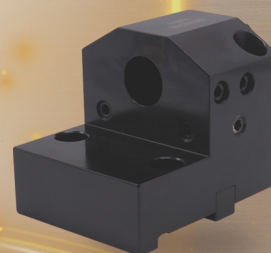

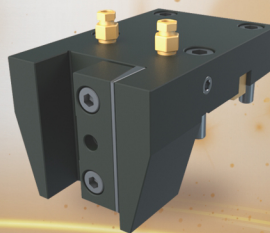

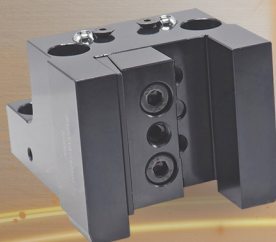

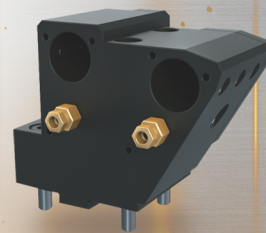

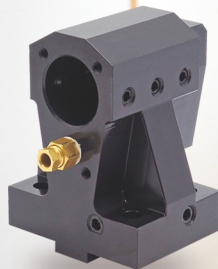

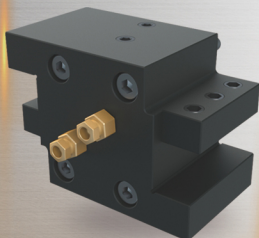

Integrated center-through-coolant effectively removes debris and prevents entanglement, extending the life span of tool and maintaining cutting performance and efficiency.

3. Full Range of Models with Flexible Compatibility

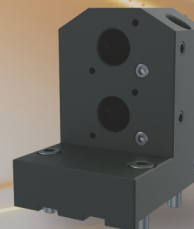

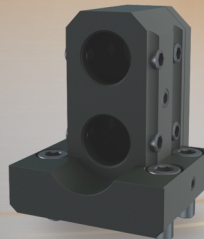

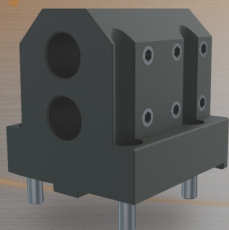

All series of models are compatible with fixed head lathes. Custom configurations are available to meet the specific machining needs.

4. Taiwan Locally Manufactured

Designed and made in Taiwan with stable quality. Professional technical support is always on standby.
