

# JG1-E

## 數控內徑磨床

NC INTERNAL GRINDER

EASY  
 ECONOMIC  
 ENSURE

### I. 強大加工能力 :

1. 本身採用FC30整體鑄造而成，強化的結構設計，機台穩固，壽命長。
2. 諸磨內徑 Ø 6mm~Ø 150mm，研磨範圍廣大。
3. 強大的機構剛性，切削能力加大，研磨速度快，生產能量大。

### I. Strong Capacity:

1. The machine body is made of FC30 one piece casting and is designed to strengthen the structure. Firm body & powerful tensile strength assure the machine not deformed.
2. Work capacity: grind dia: Ø 6mm~Ø 150mm
3. The strong structure machine create high efficiency, high accuracy and mass product.

### II. 經濟成本效益 :

1. 單一孔徑，單一平面加工研磨的最佳機型，優勢的成本選擇。
2. X, Z 軸分離設計，降低機械故障率，提高生產效率。
3. 機身簡潔設計，佔地面積小。

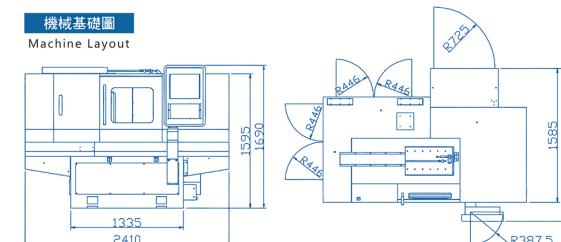

### II. Cost Effective:

1. The best choice of grinding machines with single hole and single flat face grinding.
2. To separate X and Z-axes for low maintenance and high efficiency.
3. The machine body is lean and simple, covers small area.

向應機械工業股份有限公司  
HSIANG YING MACHINERY CO., LTD.

# 01

高精度 高效率實現  
High Precision & Efficient

# 02

多段工序磨削機能  
Multi-processes Grinding Function

# 03

優越操控性  
Outstanding Operation

1. $\mu$ 的控制設定系統及高剛性的滾柱滑軌設計，  
提高轉向的定位精度。

2.高效率研磨，成本控制最佳化。

1. $\mu$  control-setting system and a design of  
high-rigidity roller rail track enhance the  
precision of locating axis.

2.Efficient grinding, cost-optimize

一次裝夾，內端面、內孔、端面等多工序一次完整  
磨削加工，完整提供20個工程程序的連續加工，  
工作能力強大。

JG1 integrates multiple processes, one chucking  
then inner face, bore and end face, into full  
grinding processes. Its powerful working ability  
completes a serial of 20 procedures at one time.

#### 1.JIMATIC S-7000(S-8000)

- a.10"觸控面板，新世代HMI對話式。
- b.具專家系統功能之“智慧型研磨控制器”，讓研  
磨更貼近使用者。
- c.建立專業研磨資料，使定義砂輪和修砂點更為  
容易。

#### 2.JIMATIC F-9000

- a.控制器：為了使客戶能安全、容易、多功能的操  
作JG1，本公司使用FANUC之控制器，搭配  
我們自行開發之研磨軟體。
- b.研磨軟體件(選配)：  
完整提供20個工程程序之連續加工(包括內端面  
、內孔、端面等程序)，工作能力強大，研  
磨排程變得容易，校機正確又快速。

#### 1.JIMATIC S-7000(S-8000)

- a.10" touch panel, new HMI interactive
- b. "JIMATIC S-7000(S-8000)" with intelligent expert  
system makes users easy to operate.
- c. Create professional grinding data, wheel  
definition and dresser point setting quickly.

#### 2.JIMATIC F-9000

- a.Control System:  
FANUC controller and self-developed grinding  
software are designed for safe and easy operating.
- b.Grinding software (option):  
Perfect 20 procedures of grinding workpieces  
at one time, including inner faces, inner and end  
face, etc., which creates strong capacity, simple  
grinding, high efficiency and high accuracy.
