錫昌科技企業有限公司 42942台中市神岡區東洲路137-12號·TEL:886-4-25225873·FAX:886-4-25289439 慶昌齒輪企業有限公司 No.137-12, Dongzhou Rd., Shengang District, Taichung City 42942, Taiwan.

SHYI CHANG Manufacturer of Precision Gears | ISD/TE 16649

FROM 1966 TO PRESENT, WE NEVER STOP GROWING

- 2018 Dajia Youth Industrial Park production line start using.
- Imported the Taiwanese HURISE internal grinder, the Japanese MURATEC Twin Spindle CNC Chucker, and the German KAPP gear hobbing equipment.
- Imported the Japanese Mitsubishi gear shaping machine.
- Imported the German WENZEL gear tester.
- Imported the CNC Lathe Auto Feeding System.
- Obtained ISO/TS 16949:2009 certification.
- Taiwanese Lu Ren's blade sharpening machine and the Japanese Mitsubishi vertical gear hobbing machine.
- Change CHIN-CHAN Gear Wheel Machine Factory changed to CHIN-CHAN Gear Enterprise Co., Ltd.
- Imported Japanese SWIWA vertical gear hobbing equipment Imported the German KLINGELNBERG gear tester.
- Obtained ISO 9001: 2000 International Quality Certification. Imported the German KOEPFER CNC gear hobbing processing equipment which make skiving process and the highest precision can be reach to JIS 3.
- Imported the Swiss REISHAUER gear grinding equipment and the highest precision can be reach to JIS O.
- YU FONG gear grinding factory changed to SHYI CHANG Enterprise Co., Ltd.
- Established YU FONG gear grinding factory.
- Factory moved to Dongzhou Rd., Shencang dist., Taichung City
- Built new factory in Yuanhuan N. Rd Fengyuan Dist., Taichung City CHIN-CHAN Gear Wheel Machine Factory had been registered.
- Established LONG SING Wheel Machine Factory in Fu Chun village, Fengyuan Dist., Taichung City .

Company Profile

MANUFACTURE HIGH QUALITY PRODUCTS, AND OPERATE WITH INTEGRITY

提升全面品質、追求顧客滿意

ABOUT US

Shyi Chang Enterprise Co., Ltd founded in 2004, specialized in manufacturing wide range of precised gears and machining parts.

Gear grinding is our main force, producing with high quality and high accuracy. In order to promote product quality and enhance production efficiency we introduced gear grinding machine, gear hobbing machines and gear shapers from Switzerland, Germany and Japan

For quality management we set up strict quality inspection standards to fully control the quality.

our inspection equipment including German KLINGELNBERG gear testers, 3D CMM, roundness testing and profile projector and so on.

At the same time, the certification of ISO/TS 16949 quality management system to cultivate an outstanding technic team, to formulate efficient process, and establish quality inspection system.

Since the establishment of the company, SHYI CHANG holds the spirt of excellent quality of products, and honest operation.

We use coutious attitude, avant-garde equipment and professional production process to meet customer request and make a good long term relationship.

Automobile Industry, Electric vehicle industry, speed reducer, Electronics Industry, Electrical tools, Machine Transmission Mechanism, Robotic Application, Aviation Mechanics,

SHY CHANG Manufacturer of Precision Gears

Production Process

TO UPGRADE TOTAL QUALITY LEVEL, COMMITTED TO CUSTOMER SATISFACTION

Research And Development

產品研究·設計開發

STRATEGIC PLANNING:

We go through APQP and Co-ordinate production process for customer lean planning.

PROJECT SERVICES:

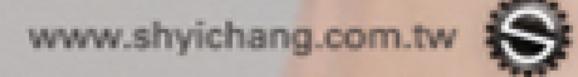

Provide our team service for customer request, plan integration management structure, which makes progress and quality of accurate in place.

DESIGN STRENGTH:

We have professional engineering team, provide from development to production, perfect risk assessment, and perfect process design.

PROJECT EXECUTION:

Our production main point is using Process-oriented system to meet customer technical specifications and requirements.

HOBBING

Brand new Hobbing machine with fully automatic parts feeding systems from German and Japan. The highly automated production lines make consistent quality and more efficient production possibities. In addition, skiving is available to upgrade the gear accuracy.

........

.......

SHAPING

This gear shaper is capable of machining helical gears.

It employs electronic bushing without need of the use of expensive mechanical bushing, which leads to machining cost saving, upgraded production efficiency.

Accuracy

capability

JIS 3 AGMA 1 DIN 7

08 / 09 Shaping

Max. 0D 320mm

AGMA 10 | Max. Modulus M8

GEAR GRINDING

To enhance gear grinding accuracy, high gear matching efficiency, reduce vibration and minimize noise.

The surface of roughness reach to Ra 0.5

custom-diamond dresser, make gear profile and any variety shape optimize
